

Cyber Intelligence and Analytics

Wilson Consulting Group (WCG) has a comprehensive, effective, and efficient cyber intelligence analytics service. Through this service, we minimize threats, prevent security breaches, and alert users to unusual activity by monitoring networks in real-time. WCG provides substantial visibility into threats and risks to which organizations would otherwise be blind. The visibility helps organizations to prevent breaches before they happen. Our technology's extensive range of early indicators decreases the time it takes to detect a threat. WCG gives your firm the knowledge and tools it needs to mitigate any damage resulting from potential attacks. We pride ourselves on our exemplary customer service and high levels of customer satisfaction.

Reasons to Choose WCG's Cyber Intelligence and Analytics Service

- To stop the bad guys – both those who are in the company and those trying to get in
- To save time and resource drain by streamlining security process
- For excellent customer support – we provide around the clock and personalized customer service
- To realize a positive return on investment within 12 months
- Our high reviews from our customers who strongly recommend our services at very high rates
- To easily meet compliance requirements (PCI, HIPPA, FISMA, NERC, SOX, GLBA, DoDI, etc.)
- To take advantage of the following Cyber Security service features
 - Enterprise Security Intelligence
 - Incident response and threat management
 - Network Behavior Anomaly Detection (NBAD)
 - Privileged user monitoring
 - Insider threat and fraud detection
 - Protection from Advanced Persistent Threats (APT)
 - File integrity monitoring
 - IT optimization

Cyber Intelligence By Industry

BANKING AND FINANCE:

Our cyber intelligence and analytics service has helped financial institutions to increase fraud detection and prevention while meeting compliance requirements through industry leading advanced analytics, automated behavioral analysis, and pattern recognition.

RETAIL AND HOSPITALITY:

WCG's cyber intelligence service has delivered comprehensive solutions for retailers and other enterprises to protect customer credit card information and to help them to meet compliance requirements.

ENERGY AND UTILITIES:

We have helped energy and utilities organizations to better protect high-profile, critical infrastructures from advanced threats while meeting industry regulations.

HIGHER EDUCATION:

Our cyber intelligence and analytics service has helped higher education institutions to secure confidential student data, optimize IT operations, and meet compliance requirements through powerful machine analytics.

HEALTHCARE:

We help healthcare organizations to secure patient data, to improve visibility into different log sources from EHR/EMR platforms, and to comply with industry regulations.

GOVERNMENT:

We have delivered continuous monitoring, robust collection capabilities, and continuous compliance assurance to federal organizations.

Cyber Intelligence and Analytics Service Protects Against Damage Caused by

- Dangerous IPs accessing internal and external infrastructure
- Users visiting risky URLs
- Phishing attempts
- Malware propagation
- Advanced Persistent Threats (APT)
- Other high-impact activities

WCG's Cyber Intelligence and Analytics service will save your organization time and money by providing immediate 24/7 protection. Our service ensures that your network and/or systems will always be monitored by knowledgeable staff with industry skill and certifications.
